

MAX-truder GmbH is an up-and-coming company that develops innovative machines for the production of precast parts for the construction industry. Likewise, MAX-truder GmbH produces and distributes spare parts worldwide, including services such as installations, commissioning as well as maintenance of existing machines and equipment.

At our location in Gau-Algesheim, Germany, we are looking for a motivated and dedicated employee as a

Electronics engineer/ Mechatronics engineer (m/w/d)

Your tasks

In this versatile position you will take on the following main tasks:

- coordination in the area of control engineering, hardware and software
- Preparation of assembly, control and operating concepts
- Control and coordination of internal and external resources as well as of or with suppliers
- Creation of detailed requirement specifications, functional descriptions and specifications
- Creation and adaptation of programs or coordination of adaptations with suppliers
- Commissioning of electrical systems in the factory and at our national and international customers' sites
- Execution of product specific customer trainings
- Customer support via telephone and remote maintenance

Your profile

Your skills and experience profile should include the following characteristics:

- You have completed vocational training as a mechatronics technician / electronics technician or electrician with further training as a certified technician in one of the fields of automation or electrical engineering or a corresponding degree
- You have several years of professional experience in control engineering in a comparable position, ideally in an international environment
- Basic knowledge of automation technology as well as machine directives (MRL) and the relevant standards
- Advanced knowledge of circuit diagram creation (EPLAN), PLC programming (Siemens Step7)
- Fluent in written and spoken German and English, preferably with additional foreign language skills
- An independent way of working, willingness to work and travel as well as flexibility, reliability and a self-structured way of working complete your profile
