

About us

For more than 70 years, MAX-truder stands for the highest quality and reliable innovations for the precast concrete industry. Our products and solutions optimise production processes worldwide and set standards for efficiency and sustainability. With over 450 successfully completed precast concrete plants for prestressed and reinforced concrete elements worldwide, we are a leading player in our field. Following the entry to the Indian market. We are looking for a motivated and committed employee to join the design department of MAXTRUDER Pvt. Ltd. based in the New Dehli region IMMEDIATELY.

We are looking for you as Head of Design (m/f/d)

Your Tasks

These tasks await you:

- Own the overall design of our products (concept to detailed design, calculations, material selection, validation)
- Ensure designs meet functional, safety, quality and industry-standard requirements (codes, standards, engineering risk assessments, design-for-safety)
- Drive value engineering and design optimization for performance, cost, reliability, and ease of manufacturing/assembly
- Lead and mentor a team of design engineers/drafters, set objectives, review performance and support skill development
- Monitor industry trends, tools (CAD/CAE/PLM) and standards relevant to mechanical design in the Indian market

Your Profile

What you bring to the table:

- Experience in leading design teams, mentoring engineers, reviewing their work and setting technical direction
- High proficiency in 3D/2D CAD tools such as SolidWorks, Inventor, CATIA or AutoCAD, including assemblies, detail drawings and GD&T
- Good command of design calculations and relevant Indian/international standards for our specific domain (construction machinery, precast equipment)
- Ability to plan and track design work: scoping, effort estimation, scheduling, risk management and reporting to management/customers
- Openness to new materials, processes and technologies (IoT integration, automation, advanced manufacturing) and driving their adoption in products

Our Offer

Flexitime model • No shift work • 21 days' holiday • Permanent position with a global technology leader • Competitive remuneration • Good work-life balance • Networking opportunities and simply having fun with colleagues at team events

Interested?

Do you feel at home in a lively, international environment and are you interested in a future-oriented workplace?
