Collaboration to drive innovation in precast concrete solutions for Indian market: MAX-truder and Schwing Stetter India announce cooperation

MAX-truder GmbH, a leading manufacturer of machinery for precast concrete production, and Schwing Stetter India Pvt. Ltd., a renowned manufacturer and supplier of construction equipment, have entered into a cooperation agreement. The aim of this collaboration is to enter the precast concrete market in India offering customers innovative and cost-effective solutions.

The collaboration allows both companies to bring together their experiences in precast concrete technology and engineering excellence in addressing the customer-oriented requirements. MAX-truder brings decades of experience in extrusion technology and specialises in precast equipment for a wide range of precast concrete elements. Schwing Stetter India, a leader in manufacturing and supply of concrete con-

struction equipment, leverages its strong market presence, expertise in innovation and quality, strong customer orientation to enhance the local and custom-built product offerings to the customers.

"This partnership enables us to address the increasing demand for high-quality precast concrete products in India more effectively," says Arne Völker, COO of MAX-truder GmbH. "With Schwing Stetter India, we have a strong partner who understands the local market exceptionally well."

"We are excited about this collaboration with MAX-truder. By combining our expertise, we can deliver innovative, sustainable and highly efficient solutions that support India's growing construction industry," adds V. G. Sakthikumar, Chairman and Managing Director of Schwing Stetter India.

A partnership for the future: From right to left: Arne Völker (COO of MAX-truder GmbH), V. G. Sakthikumar (Chairman and Managing Director of SCHWING Stetter India) and Felix von Limburg (Shareholder of MAX-truder GmbH) present the signed agreement at bauma 2025 in Munich, Germany, marking the beginning of their collaboration
